

AUTOMATIC INTERIOR SLIDING DOORS

SPORSON

INTERIOR DOORS

A new contribution for the architectural design represents a new generation of automatic INTERIOR sliding doors. Our products cover all aspects of INTERIOR solutions for medium frequency traffic:

Business use; medical care, tourism, commercial use, use in offices, rooms, toilets, interior passages, access control ...

Personal use; living rooms, kitchens, bathrooms, toilets ...

INNOVATIONS we build are focused on smooth and silent operation, simple and secure use, are integrated by built-in sensors. They are of modern design in decoration, materials, colors and smart application by using communication technologies.

A new attractive 6 cm slim drive with different leaf solutions presents a complete story of perfection. Integrated sensors increase safety and decoration gives doors a personal touch.

400 thales

glass door without frames

Single glass leaf, satin or color transparent with minimalist stainless glass hinges. The doors are smoothly merged with interior. You can choose anodized color of drive cover and door handle decoration.

400 fusion

glass door with aluminum frames

Aluminum framed, double glass leaf, satin or color transparent screen printing. Harmony in drive and leaf is an advantage. You can choose anodized satin, brushed or polished color of profiles, drive cover and door handle decoration.

400 timber

wood door without frames

Leaf can be made of different materials, veneer finished, lacquered mat or gloss. Natural or domestic appearance can be integrate with furniture, office and lobby. By using anodized color, drive cover harmonized with natural design of wood, door handle decoration.

LINE DESIGN

INTEGRATION OF PRODUCT LINE 400

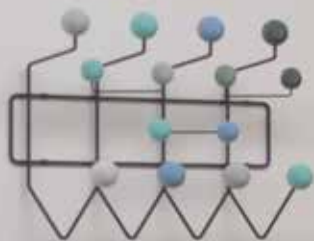

We leave a personal note in creating our living space. Standard products are not a challenge for us.

Our home is our INTERIOR. By creating our living space, we arrange our style. We bring familiarity in our rooms and express our personal style and taste.

There are no limitations in creating perfection. Build your own space.

Your style is our business. We create our work, hold meetings and organize our space to make an impression.

Advantage, we create modern, luxury, prestigious, elegant, comfortable, impressive vs. simple, minimalistic. We are all able to create our perfect space at home and in business environment.

ENERGY SAVE MENTALITY

The automatic door system complies with low energy consumption DIRECTIVES and STANDARDS.

ENERGY SAVING

Doorson's goal of energy-efficient interior building is highly attained through an adaptable door controller system that guarantees economical electric power consumption day in, day out, all year round, when the doors are still.

Our calculations display an excellent electric power consumption of less than 0,5W in sleep mode, which means 70% less power usage than other standard doors on the market.

Through reduced electricity expenses, the entire investment will be refunded in just a few years.

That is our contribution to reducing global emissions.

INTERIOR INTEGRITY

Our product line 400 is perfectly integrated into your living space.

There are many benefits:

Air-flow restriction: kitchen, toilet, smoking area...

Noise reduction: office, sleeping room...

Limited access: business entrance, secure department...

Decoration inside by integrating interior materials, decoration.

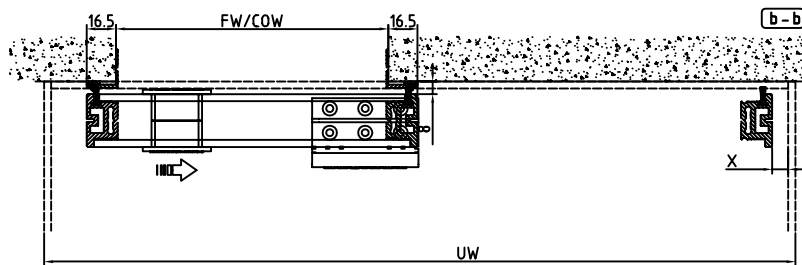

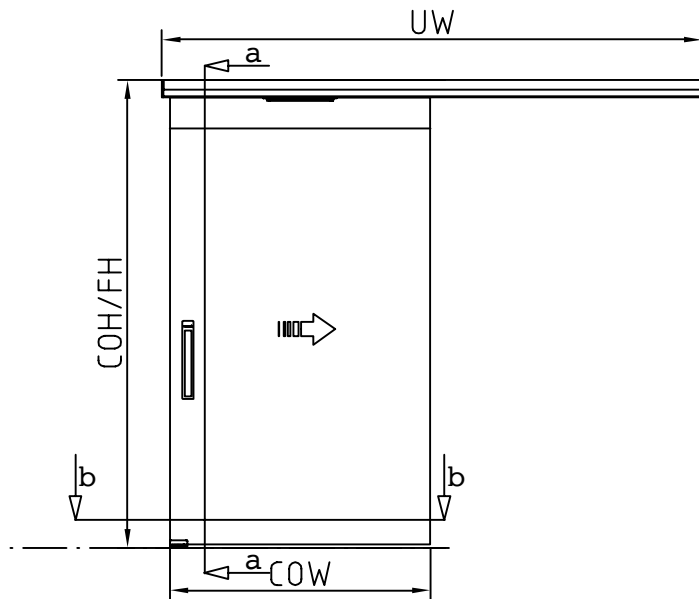

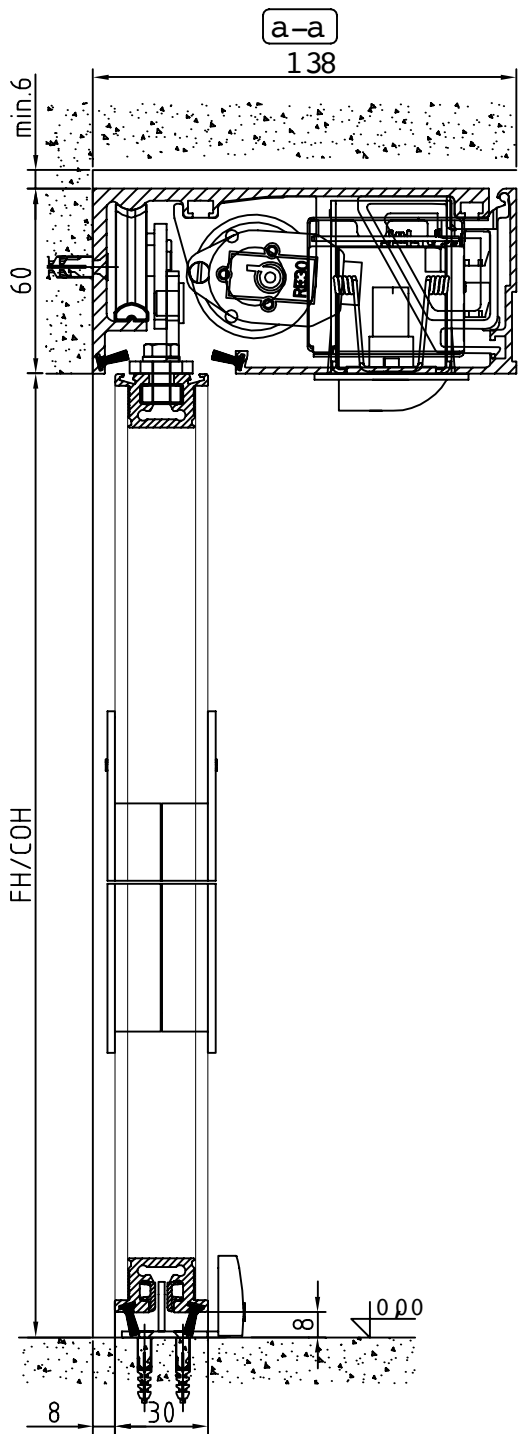

Perfection in style by using colors, lines, various surfaces.

We have focused on architectural details by integrating decor in handles and on drives; materials like wood, metal, textile and other artificial materials give furniture, tables, desks or sofas a personal note.

Combining esthetic details, lines, minimalistic style at home and in office is our goal.

Be creative!

	drive cover DECOR
	AUTOMATIC, PUSH&GO
	SENSORS are integrated in the front side of the drive, opposite side head on COM switch family
	energy saving ability, power consumption < 0,5W

OPERATIONAL SWITCHES FAMILY

Standard automatic doors apply different operational switches at the same place. Existing operational switches come from different manufacturers and therefore are of different styles.

Our goal is to apply common family OPERATIONAL SWITCHES for automatic doors. We integrate different functionalities in our PRODUCT FAMILY:

COM21 basic mode selector for simple users.

COM20 advanced mode selector for advanced users, as well as installation, service and maintenance personnel.

SENSE SWITCH touchless opening for hospitals and for persons with disabilities.

RFID SWITCH access control functionality

EMERGENCY SWITCH for doors on escape routes and emergency exits, fire doors and safety exits.

These are our main advantages in comparison to other products on the market.
